Invitation to join the Humanist International

The analysis of the current situation, prepared by the International Federation of Humanist Parties (IHP) in August 2022, <https://www.internationalhumanistparty.org/es/doc/analisis-de-la-situacion-mundial-eci-phi-agosto-2022-August-2022>, shows the current moment, in which we find ourselves, generated by a closed, inhumane and violent system, the capitalist system in all its expressions. A system that is already outdated and that has failed because it generates a lot of pain and suffering among populations.

Currently, there are enough resources for all inhabitants of the planet to have decent living conditions, however, inequality prevails.

The current global social system, in deep crisis, attacks the very existence of the human species and life on the planet. The increase in violence in its different forms: physical, religious, economic, racial, sexual and psychological, has its clearest expression in the different armed conflicts currently in force and in their consequences, generating a feeling of possibility of its increase in the future.

People do not want this state of things, but it is a minority that, taking control of the social whole, drags people in a destructive direction. We are aware of the current urgency with the nuclear danger, the climate crisis and people's mental breakdown. The conditions are in place to speak clearly about the need to give a new direction to events, deciding between "increasing peace or increasing destruction".

We know that popular power is currently kidnapped by big world capital, which includes the military-industrial complex, and that there are many people, social organizations, political parties, etc. who are aware of the need to produce a great change towards a truly human and non-violent world, and in this task we are all necessary, contributing different points of view to the whole through exchange.

Therefore, at IHP/HI we are generating a broad space for convergence of diversity and horizontal exchange that can contribute positively to the cohesion and strengthening of people, groups and parties in achieving a common objective: **the union of all humanists in the world, for the construction of a Universal Human Nation**. And this space is **the Humanist International (HI)**. The activities promoted by HI are Forums, Meetings, Conferences.

For this reason, from IHP/HI we write to you to invite you to be part of the Humanist International, for this it is necessary to adhere to the Humanist Document and agree with the Document of the Humanist International. We attach the documents and the membership application.

Waiting your answer

We greet you fraternally.
